

Liberty-Excelsior Springs

Construction Priority: First

This 12.93-mile corridor is composed of several segments. The first two segments consist of 7.24 miles of hard surface, on-road bike trail that begins on H Highway in Liberty and runs northeast to JJ Highway. Rolling terrain, stream crossings, tree lined

segments and farmland hilltop panoramas provide users with a variety of experiences. From JJ Highway the remaining segments will become an off-road, hard surfaced trail. As the trail user enters Excelsior Springs, tree-lined streets lead into the downtown area to the Hall of Waters and the historic Elms Resort. Connections to Excelsior Springs and Liberty's trail system are possible from this route.
