PROCEDURE FOR PUBLIC IMPROVEMENTS PROJECT PLAN SUBMITTAL.....	1
GENERAL PLAN REQUIREMENTS FOR PUBLIC IMPROVEMENT PROJECTS	3
General.....	3
Required Notes General	3
Required Notes Individual	4
Water.....	4
Sanitary Sewers.....	4
Streets & Storm Drainage	5
Approval Block.....	5
Private Improvements	5
REQUIREMENTS FOR PUBLIC IMPROVEMENT PROJECT PLAN PREPARATION	6
Introduction.....	6
General.....	6
Title Sheet	7
General Layout Sheet.....	8
Streets.....	9
Storm Drainage	9
Sanitary Sewer & Water Lines.....	9
Site Grading Plan	10
Plan and Profile Sheets	10
Streets.....	11
Storm Drainage	12
Sanitary Sewer & Water Lines.....	13
Cross-Section Sheets.....	14
Standard & Special Detail Sheets	14
State Standards to Supplement County Standards.....	14
Construction Record Drawings.....	15
DESIGN CRITERIA FOR SANITARY SEWERS & APPURTENANCES.....	16
Design Factors	16
Sewer Design	16
Maximum Size.....	16
Minimum Size.....	16
Materials of Construction	16
Minimum Slope	17
Increasing Pipe Size.....	17
High Velocity Protection	17
Alignment	17
Manhole Construction.....	17
Manholes.....	18
Sewer Locations.....	18

Cleanouts & Lampholes.....	18
Protection of Water Supplies	19
Aerial Crossings.....	19
DESIGN CRITERIA FOR WATER LINE CONSTRUCTION	20
General.....	20
Location of Water Mains & Appurtenances	20
Depth	20
Materials of Construction	20
Fire Hydrants	20
Line Valves	21
Tapping Sleeves & Valves.....	21
Connections to Existing Water Mains	21
Provisions for Future Extensions of Water Mains	21
Thrust Blocking	21
Highway & Railroad Crossings	22
Street Crossings	22
Fire Flow Requirements.....	22
DESIGN CRITERIA FOR STREET IMPROVEMENTS	23
General.....	23
Functional Classification of Streets	23
Local Streets.....	23
Collector/Commercial Streets.....	23
Arterial Streets	23
Street Design Standards	23
Off-Center Street Intersections	24
Intersection Vertical Alignment.....	25
Minimum Angle of Intersection.....	25
Maximum Gradients	25
Grading Gradients.....	25
Tangent Length	25
Connections to Existing Pavements.....	25
Storm Drainage	25
Cul-de-Sacs	25
Temporary Turn-Arounds.....	25
Monument Boxes.....	26
Other Design Criteria.....	26
Driveway Elevations.....	26
Signage.....	26
DESIGN CRITERIA FOR BOX CULVERTS AND BRIDGES.....	27

DESIGN CRITERIA FOR STORM DRAINAGE FACILITIES.....	28
General.....	28
Exceptions.....	28
Minimum Standards of Analysis	28
Methodology of Analysis.....	28
Criteria for Drainage System	29
Minimum Standards of Design	30
Enclosed Systems.....	30
Open Systems.....	30
Overflow Systems.....	30
Design Storm Frequencies	30
Runoff Computation	31
Antecedent Precipitation.....	33
Pipe Sizing	33
Depth.....	34
Curb Inlet, Junction Boxes & Other Points of Entry	34
Open Channels.....	34
Natural Channels.....	36
Culvert.....	36
Permanent Drainage Easements.....	37
Storm Sewer.....	37
Improved Open Channel.....	37
Natural Open Channel.....	37

LIST OF DESIGN AIDS

Typical Sections Local Street and Collector/Commercial.....	DC-1
Typical Sections Minor and Major Arterial.....	DC-2
Street Pavement Type	DC-3
Intersection Clear Sign Triangle	DC-4
Intersection Vertical Alignment.....	DC-5
Minimum Stopping Distance	DC-6
Minimum Stopping Distance	DC-7
Rainfall Duration Intensity Curves	DC-8
Rainfall Intensity Kansas City Metro Area.....	DC-9
Flow (Inlet) Time Nomogram.....	DC-10
Channel Flow Time Nomogram	DC-11
Manning's Roughness.....	DC-12
Head Loss Coefficient.....	DC-13
Rainfall Time of Concentration Nomograph	DC-14
Nomograph for Flow In Round Pipe Manning's Formula.....	DC-15
Headwater Depth for C.M. Pipe Culverts w/Inlet Control	DC-16
Headwater Depth for C.M. Pipe Arch Culverts w/Inlet Control	DC-17
Head for Standard C.M. Pipe Arch Culverts Following Full $n=0.024$	DC-18

Head for Standard C.M. Pipe Arch Culverts Following Full $n=0.024$	DC-19
Head for Structural Plate Corr. Metal Pipe Culverts Flowing Full $n=0.0328$ to 0.0302	DC-20
Head for Structural Plate Corr. Metal Pipe Arch Culverts 18" Corner Rad. Flowing Full	DC-21
Headwater Depth for Concrete Pipe Culverts w/Inlet Control	DC-22
Headwater Depth for Concrete Pipe Culverts Long Axis Horizontal w/Inlet Control	DC-23
Headwater Depth for Oval Concrete Pipe Culverts Long Axis Vertical w/Inlet Control	DC-24
Headwater Depth for Circular Pipe Culverts w/Beveled Ring Inlet Control.....	DC-25
Head for Concrete Pipe Culverts Flowing Full.....	DC-26
Head for Oval Conc. Pipe Culverts Long Axis Horizontal or Vertical Flowing Full.....	DC-27
Head for Concrete Box Culverts Flowing Full	DC-28
Headwater Depth for Box Culverts w/Inlet	DC-29
Nomograph for Flow in Triangular Channels.....	DC-30
Capacity of Curb Opening Inlet at Low Point in Grade	DC-31
Inlet Capacity Curves with $L=5'0''$	DC-32
Inlet Capacity Curves with $L=8'$	DC-33
Inlet Capacity Curves with $L=11'$	DC-34
Hydraulic Element of Circular Conduits	DC-35
